

**Statement from the Louisiana Science Teachers Association  
Student/School Performance and Support Committee Meeting  
Louisiana Board of Elementary and Secondary Education**

**December 7, 2010**

“The Louisiana Science Teachers Association supports the recommendation of the outstanding science educators who served on the Science Textbook Adoption Committee. These science educators were chosen based on their content expertise and years of providing successful classroom instruction. Each of them devoted hours of their time to complete a review of each textbook to ensure that the information is accurate and further also aligned to our state’s comprehensive curriculum. The Louisiana Science Teachers Association requests that the BESE members accept the work of these dedicated science teachers and approve the list of textbooks recommended by the committee.”
